

Speaker Bridges & Backboxes

Clarity offers speaker mounting hardware to securely mount your ceiling speakers. The metal bridge provides a solid mounting structure for ceiling speakers, prevents ceiling tile sag and is galvanized to inhibit rusting. This bridge may be used with all Clarity flush mount ceiling speakers. The backbox prevents debris and insulation from coming into contact with the speaker. The sturdy metal construction of this backbox allows it to be used in plenum return ceilings. In open ceiling structures, the backbox may be used as an enclosure for a speaker by attaching the backbox directly to the beam and mounting a speaker to the backbox with the hardware provided.

Features & Advantages

Metal Backboxes

Sturdy metal backbox protects the speaker from debris.

Metal Bridges

Prevents ceiling tile sag.
